

PARAM PAGHADAR

FLUTTER INTERN DEVELOPER

Surat, Gujarat | paghadarparam2@gmail.com | +917046307611 | [parampaghadar.vercel.app](#)

SUMMARY

I'm an M.Sc. IT student (3rd semester) learning and building mobile apps with Flutter. I enjoy turning ideas into clean, functional, and user-friendly apps. I'm passionate about fintech and blockchain, always exploring new technologies and improving my coding skills. Looking for an internship where I can learn from real projects and grow as a Flutter developer.

TECHNICAL SKILLS

- Flutter & Dart
- SQLite Database
- Web3 & Blockchain Basics
- Firebase
- Git & GitHub
- Smart Contract
- REST API Integration
- Responsive Design
- Postman

PROJECTS

Flutter E-Commerce App UI (Amazon Clone) | [Link](#)

- Implemented a modern shopping app interface inspired by Amazon, focusing on clean visual hierarchy and intuitive screen flow.
- Organized UI elements into clearly structured modules to make future feature expansion simple.
- Enhanced usability by applying spacing, typography, and layout balance to create a smooth browsing experience across devices.

Flutter Book Reader App (UI Prototype) | [Link](#)

- Reduced UI code by ~40% through reusable custom widgets and a clean, scalable project structure.
- Achieved consistent layouts on 10+ devices with adaptive responsive design techniques and testing.
- Improved state handling and navigation flow, cutting UI rebuild issues by ~25% and boosting performance.

EDUCATION

Master of Information Technology

July 2016 - Present

Parul University, Vadodara, Gujarat

- Major in Cyber Security and Forensic.
- Final CGPA Secured: 8.68 / 10

Bachelor of Information Technology

June 2019 - May 2022

Uka Tarsadiya University, Bardoli, Gujarat

- Final CGPA Secured: 6.04 / 10

CERTIFICATIONS

1.Bharatiya Antriksh Hackathon 2025 | [Link](#)

- Developed an AI-powered chatbot to handling user queries with real-time automated responses.
- Implement NLP techniques for better understanding and interaction.
- Showcased skills in AI integration, problem-solving and innovation solution development.

2. IBMCE CEPYT1IN Certificate | [Link](#)

- Completed IBM Certified Python Programming course with hands-on practice in variables, loops, functions, OOP and file handling.
- Gained practical experience in building Python-based mini projects, problem solving, and writing clean and optimized code.
- Familiar with data handling, basic debugging, libraries usage, and applying Python in real-world development tasks.

3. Cryptography Certificate by SkillUp | [Link](#)

- Learned the fundamentals of encryption, decryption, hashing, and key management used in secure communication.
- Gained understanding of symmetric and asymmetric cryptography (AES, RSA) and how cryptographic algorithms work.
- Built confidence in applying basic security and cryptography concepts to software and system protection.
